The first 100% online Summit for all climate champions, decision makers and procurement leaders, driving climate transformation!

The [CLIMATE TRANSFORMATION Summit](#) addresses climate leaders and decision makers who are now driving climate transformation in companies. At #CTS2022, decision and change makers who are already applying transformation measures will share their experiences on the implementation of net-zero targets along their supply chain. Therefore, the #CTS2022 constitutes a great opportunity to meet and get to know providers of climate-relevant solutions. In two interactive days, the Summit will present CO₂ reduction opportunities and how companies can use them to achieve their climate goals in panels, workshops and an online trade fair.

The #CTS2022 will be held in English.

- On the 2nd & 3rd of June 2022, companies in different phases of climate transformation will show how they are decarbonizing their industries and supply chains.
- Companies will share their best practices and meet solution providers who support them in measuring, reducing or offsetting CO₂.
- Speakers from different industries as well as politics and research will show how they are implementing the climate goals and how we can advance the climate transformation together.
- Solution providers from the 9 impact categories: Energy, Buildings, Production, Mobility, Food, Digital, Environment, Society and Finance show in an online exhibition how to reduce CO₂ with their solutions now.
- In interactive workshops, experts from the field and the emerging Climate Tech sector will work with participants to develop action plans for climate transformation.
